System Requirements:

Turn off Wi-Fi and other background processes before beginning the installation. Some observations on the game experience, after the installation of the game on the device: The screen of the device does not work in portrait mode, it works in landscape mode, so the program is compatible only with phones that have a landscape screen. It is recommended to connect the phone with the screen turned off, in order to reduce power consumption. Games are automatically removed from the device's cache after they have been installed. Data and network are saved automatically when not playing.
