
Kamael 'LINK' Download Client

hello. I'm trying to set up a kamael server. but when I edit the client with l2encdec and edit my ip and stuff. seems to be ok, but when I try to run the .exe I don't have nothing. can't be a server? This is my l2encdec. <http://dummy.kamael.net/l2encdec.exe>
Are you trying to run an .exe file that has a .ldc? If so, you need to change the 'L2encDec' setting in your l2encdec.ini file. To do this, to open the Registry Editor, press Windows key + R and type regedit and then press Enter. Navigate to the following registry editor path: HKEY_LOCAL_MACHINE\SOFTWARE\Kamael\L2encDec This registry editor path contains the l2encdec.ini file.
