[Structural changes in the area of stapes in a man of extreme longevity]. The study on the stapes was performed in a man of extreme longevity because of the removal of the left stapes. Findings have shown that the two structures in the middle ear, the stapes and the incus, are formed in two stages: the stapes is formed first, and then the incus. The normal stapes consists of the bone, the perilymphatic space, and the membrane the ossicles. In the old stapes, the perilymphatic space and the bone have disappeared. The membrane is thin and the mobility is almost zero. In the extreme case of the old stapes, we have only a thin membrane with lost mobility. It can be concluded that the stapes without perilymphatic space shows atrophic changes. easy manner, giving out a quick squash, of course. With the precedent set the Curlys have had at least 1 one-year reign with their last victory, before losing in the first round of PWF's Tag Team Grand Prix against The ZZ Prowlers. Since those matches the duo of Joe Curly and Timothy Curry has been very successful in defeating multiple teams on a regular basis, winning the tag team titles twice. In all instances, their opponents were much tougher than their regular tag team partners. One caveat of this is that Curry's partner in crime, Bobby Lee, has yet to defeat in PWF. Like the situation with the Curlys, The ZZ Prowlers have had one reign with the tag team titles, after defeating The Roughnecks for the vacant titles at the end of 2011. A three way elimination match at the beginning of 2012 ended with The Roughnecks retaining the titles.
