External-program interfaces (E-PIs), that is, external software modules that are designed to work directly with AutoCAD. These are often C/C++-based software modules that are plugged in through APIs to add additional functionality. The AutoCAD RTEMS Edition supports the AMD Trusted Extensions (ATX) technology, which allows one to call unmanaged functions from the AutoCAD application itself. iOS app The iPhone, iPod touch and iPad version of AutoCAD, named AutoCAD Mobile, was first released in 2009 and is now available on all App Store platforms. It allows users to create drawings and annotate and edit them directly on their devices. AutoCAD Mobile was released as an iPhone version, as Autodesk had a license to the iPhone SDK but did not have an iPad version at the time. Autodesk got around this by purchasing a license for the iPad SDK, and is currently available on the App Store. AutoCAD Mobile supports features such as annotating, copying, linking, measuring and text editing. The user interface of AutoCAD Mobile is similar to that of AutoCAD. The application can import files from and export them to a range of drawing formats and can convert drawings to PDF. Unlike AutoCAD, the application is not completely compatible with the program; it does not support multiline text, geometric objects, or layers, and many other features are missing. AutoCAD Mobile is available free, as are all AutoCAD applications and suites. Paid versions of AutoCAD Mobile are available with access to the Pro technical support service,

which allows the user to call technical support directly from the program. AutoCAD Mobile includes an onscreen "User Guide", which can be accessed by tapping on the "Help" button in the upper left corner of the screen. The application includes a wide range of educational resources, allowing the user to learn about drawing concepts in a non-threatening way. Before that, your Autocad settings may be in the Registry (HKEY_CURRENT_USER\Software\Autodesk\Adobe\Acad\13.0\BackEnd) which is hidden by default. You can find it by running this command: regedit.exe HKEY_CURRENT_USER\Software\Autodesk\Adobe\Acad\13.0\BackEnd then, right-click on the "Regedit.exe" entry, and choose "Run as Administrator". This will open the registry editor, and you can then find your Autocad settings. If your Autocad settings are still in the Registry (and you didn't already follow the instructions in the above link) then they are hidden in the HKEY_LOCAL_MACHINE\Software\Microsoft\Windows NT\CurrentVersion\Winlogon\ReservedAutoRun section. You can find it by running this command: regedit.exe HKEY_LOC
