These formats are either native (auto) or supplemental (external). Auto formats provide the basis for all data used by the drawing, regardless of what software is used to create the drawing. AutoCAD determines which format it needs to read from or write to a file by examining each of the formats listed in the File Formats area of the Create Drawing dialog box. If AutoCAD finds that one of the formats listed in that dialog box is supported by the file type, it will automatically use that format when creating or editing the file. If none of those formats are supported, it will use the supplemental format. Types of File Formats For a general description of file formats and for information on what each format provides, see: Each format has a unique file extension. For example, if you have a text document with the file extension.txt, that indicates it is a text file. The following table lists the file formats supported by AutoCAD and what type of data they store. Supported File Formats File Format Description txt ASCII text. A text file containing a listing of characters or characters and formatting codes. Unicode text file UTF-8 file file UTF-16 file UTF-32 file ASCII, Unicode, UTF-8, and UTF-16 describe the data types and formatting used in text files. Although AutoCAD can read
