In addition to multiplayer, where you can directly connect with other players and travel together, the game supports a unique asynchronous online element that allows you to feel the presence of others. The online feature works as follows: 1. Players join in. 2. Your connection is confirmed, and a link to the game server is sent. 3. At that point, players can chat with you freely, but no events will take place. 4. When either of you attempts to perform an action such as attacking, a notification appears, and an event is created. 5. After that, the event takes place. 6. When you log out, the connection is closed, and players can now freely interact with each other. This action is not counted in your event count. When you create a new character, you can choose the statistics you want to see as well as the classes and races. Character Equipment In addition to the equipment that you equip when customizing your character, the equipment that you select as part of your class will also appear here. The default equipment will appear by default, but you can change it at any time. When you see a new item appear, it will also appear at the bottom of the menu of equipment options. You can equip up to four equipment items at one time. Therefore, if you want to equip the equipment for a class that has four items, you must select the equipment at the bottom of the menu, then start customizing your character. When selecting an item, the following information appears: - Title - Item Name - Name - Availability - Defense - Magic - Experience You can check the details of a specific item by selecting the "Show me details" option. When you are customizing your character, you can change your starting health points, muscle strength, muscle endurance, power, magic attack, and resistance. You can choose from one bff6bb2d33
