## **Features Key:**

Enhanced controls  
A change of visual style  
The player's presence now becomes more tangible  
An enhanced online system

## **Map screen**

In the previous FINAL FANTASY® XIV: A Realm Reborn public beta test, the map screen was displayed in the traditional map format, making it difficult to identify your current location or orientation.

In the new FINAL FANTASY® XIV: A Realm Reborn beta test, the map screen uses a new interface that is different from the previous beta test. The outer white border has been eliminated, providing the information on the current location more clearly and dynamically.

In addition, the map screen can be scrolled on the right side, and the current map, a marker, and landmark information is displayed.

To the right of the map, a drag-and-drop-friendly layout panel has also been added. This panel lets you arrange the various elements of the layout in a flexible manner.

## **Orientation and location on the map screen**

Orientation and location has been adjusted in order to improve usability.

Orientation is displayed to the left or right side of the map.

When you place an object with the drag-and-drop-friendly layout panel onto the orientation of your choice, that object is automatically placed in the correct location.

Location is displayed on top of the map.

When the character's current location is within a city or town, local data and markers are displayed in order to improve player's ability to quickly and intuitively find where they need to go.

## **Character information on the map screen**

When the character's current location is outside of a city or town, the character name and current information is displayed in order to allow you to know whether or not you're close to the character.

## **Equipment information on the map screen**

The character's equipment is now displayed automatically in the right panel of the map screen when you equip it.
