Enum Programs Crack

The main goal of the Enum Program utility is to perform a thorough scan of the local computer or network to extract info about the installed software. This tool scans the operating system system registry to look for all installed software. It highlights registry items that are not listed on the list and lets you highlight them or hide them. After you have set everything you want, you can select one or all the programs you want to export to your local PC. This is a very easy to use tool that does all the hard work for you. All you need to do is to point the application to the target computer (or network) and select the programs you want to export. It will then perform the scan and export the programs to a file.
