"We believe 'HyperMotion Technology' brings new possibilities for the future of football gaming," said EA Sports Senior Director of Sport Mike Jackson. "Using the core gameplay of FIFA 14 as a starting point, we've worked closely with our development teams and brought incredible new features to the game. We have established a foundation that will be able to evolve with technology in the future, and we have a number of exciting features in development that will bring an even deeper experience to the game." The new game features advanced player models, animations and animations, allowing players to run at up to 29 miles per hour on the ground, with the ability to do sprints, cut and jink at speeds never possible before. A renewed AI technology helps intelligent opponents make smart decisions based on real-life actions of the human opponent. The addition of "Dynamic Tactics" technology allows coaches to manage their team's tactics and strategy at each moment of a match through an advanced formation system allowing them to quickly change their team's approach at any time. "Dynamic Tactics technology allows you to take one single decision (in-game) and use that decision to create a completely different playing style at any moment of the game. Dynamic Tactics ties into our new Ultimate Team mode, which gives you more autonomy in your roster selection and the introduction of a new card collectible currency, coach cards, which are similar to Ultimate Team cards, but offer special bonuses and awards," said Senior Producer Stephen Murphy. One of the oldest sports games on the market, FIFA is as you would expect. A fast-paced, football-themed sports game with a variety of modes, FIFA allows you to relive the excitement of classic matches from the 30's to the 90's (if you can imagine). FIFA has been enjoying a revival in popularity in recent years, and while the series has come under criticism over the years for being as dull as the shoe-sized ball used in many matches, a constant overhaul of the formula has kept the series relevant. But as a game, FIFA is in another class: after a few lapses in quality, it has returned to form with the authentic visuals and gameplay of the franchise. FIFA has been around for decades and has enjoyed a revival in recent years. The fact that it has been on Xbox 360, PlayStation 3 and now PC makes it a more intriguing proposition for fans of the console than its predecessor, the Xbox One or PS4, and there is always an interest in seeing what the next generation will bring to console gaming. FIFA is one of the most authentic titles on consoles. This year's installment, FIFA 22, is no exception. There will be some changes, with new kits, weather effects, and player creation systems all boosting the game's appeal, though the core gameplay will largely remain the same. Finally, with a focus on more fluid animations and gameplay, FIFA has been reborn and, along with all the standard gameplay improvements, comes new features and modes which make it the first truly necessary football game on PC since 2013's FIFA 15. Key features: New pack designs - Three new home and away kits have been added for England, Spain and Germany. Easier player creation - New and improved, the new Player Impact Engine reduces the time spent customising and balancing your team. New Player Select - A selection of new Pro Clubs are also available to purchase. New game modes - The series' most popular mode, Pro Evolution Soccer, has received an overhaul. Fans can now play a classic mode in a league or knockout mode, which are just like the soccer versions of The League and The Champions League. New Player My Career - A new career mode allows players to participate in a variety of challenges. Improved Player Impact Engine - The Skill Stick Control system has been tweaked, better suits fluid movements and helps to reduce the time needed
