Field of the Invention The present invention relates to an isolation diode and more particularly to an isolation diode having a small area. 2. Description of the Related Art It is generally known that an isolation diode is used to avoid an electric charge being deposited on a substrate and a transistor. The isolation diode is connected between a negative electrode of a power supply and a gate, source, or drain of the transistor. Due to the positive bias applied to the gate, the isolation diode typically operates in a forward direction and a reverse direction. A related art isolation diode is illustrated in FIG. 1. Referring to FIG. 1, an isolation diode 12 comprises a n-type substrate 11, a p-type well 12a, and an n-type drift layer 11a. The substrate 11 comprises a negative electrode, and the p-type well 12a and the n-type drift layer 11a comprise positive and negative electrodes. In FIG. 1, a p-type region 13 is formed in the p-type well 12a. When a positive bias is applied to the p-type region 13, the p-type well 12a can be divided into an n-type portion 14, which is located in the p-type region 13, and a p-type portion 15, which is located outside the p-type region 13. In this case, a depletion layer forms at an interface between the n-type portion 14 and the p-type region 13 and at an interface between the p-type region 15 and the n-type drift layer 11a. As a result, electric charges can be prevented from being deposited on the substrate 11. The depletion layer in the n-type portion 14 extends to the n-type drift layer 11a as indicated by the arrows 16. Accordingly, the depletion layer in the n-type portion 14 extends from a surface of the p-type well 12.

In this case is the new system also called "linux". I only want to backup /home/me to another disk. My command is: rdiff-backup --backup-directory=/mnt/backupdrive/ /mnt/mydisk -r /mnt/linux It fails during the backup. If I use the command rdiff-backup --backup-directory=/mnt/backupdrive/ /mnt/linux /mnt/mydisk -r /mnt/backupdrive/ It works. Any ideas what's the reason? A: As @templatetypedex said in the comment section, you shouldn't use the --backup-directory=/mnt/backupdrive/ - setting if you don't want to backup anything from that directory. Q: Why does zoom+ scrollbar hide draggable image? I am trying to figure out how to get the link for this demo: \$(function () { \$("#drag").draggable(); }); body { d0c515b9f4

Do you want download movies of all kinds? What if I tell you that HD. Kyon Ki is a remake of the film Pyaar To Hona Hi Tha. You may want to be skeptical of the far-right positions taken by Duck Dynasty star Phil Robertson. But most Americans don't. A new ABC News/Washington Post poll finds that the wide religious divide over the flap reflects the way most voters are likely to view the Emmy-winning Robertson family program. In fact, the ABC/Post poll finds that the overwhelming majority of Americans believe that the Robertson family is like them in many respects, and feel like they can relate to them. That perspective may explain why American voters tend to see the issue differently than many on the right. Americans tend to think that religious tolerance is just something people on the left say, not something they believe. As the ABC/Post poll makes clear, there is a wide chasm between the citizens of the United States and many of its citizens' values. And this gap is not limited to the right and the left -- the survey finds that even Americans who describe themselves as very conservative or very liberal tend to have a much more positive view of the religious heritage of the Duck Dynasty family. Which is not to say that the vast majority of Americans agree with Robertson's comments. With a margin of error of plus or minus 5 percentage points, the survey finds that 7 in 10 Americans disapprove of the way Robertson described gays to GQ magazine and feel he should have to apologize for the comments. Similarly, 8 in 10 Americans say that Robertson should not have been allowed to work as a spokesman for a company that sells products to people of all faiths. However, most Americans have already made up their minds about the Robertson family and want the Duck Dynasty star to keep talking for the company, according to the survey. Get Breaking News Delivered to Your Inbox The survey also finds that most Americans think Robertson speaks for the majority of Americans, even though only a small portion of the population is affiliated with traditional Christian denominations. Most Americans see Christianity in the Robertson family not as a barrier to religious tolerance but as a source of inspiration. As others have observed, it would be reasonable to ask why the Duck Dynasty controversy has so deeply divided America. Some point to the fact that many of America's religious groups are closely aligned with the Republican Party, and therefore may have aligned with the party's view that Robertson's statements were out of line. However
