In vivo effect of Fluorofungin and Radicafungin on the liver of the chicken. The aim of this study is to establish the effect of Fluorofungin (Flucytosine; Zerit) and Radicafungin (Flu-ara-A; ICN) on the chicken liver and to determine the optimum concentrations for the treatment of chicken liver infections. Two concentrations of each drug (0.4 and 1.6 mg/kg of body weight) were injected intramuscularly to each of 8 healthy chickens. Injections were repeated daily on two consecutive days, immediately after each injection of the second concentration and on the same day, 10 days after the second dose of the second concentration. At 14 days of age and each day following, the chickens were sacrificed and blood samples were taken. The following blood parameters were measured on each animal: Total Leukocyte Count (TLC), Differential Leukocyte Count (DLC), and Platelet Count (PC). Liver function tests (LFTs) were performed on each chicken: Aspartate aminotransferase (AST), Alanine aminotransferase (ALT), Alkaline phosphatase (ALP), and Gamma-glutamyl transpeptidase (GGT). At the start of the game one player is chosen to be the Iron Republic and face off against a player representing the Reaked Empire. Both sides must be build up to full strength before an attack can be launched. Only then can the battle commence and the conflict occur. Each side has a number of units and units can fight, use their force to locate key locations, or protect their own unit. Players can build all of the units except the most powerful horse; combined with infantry troops this is a very powerful force. This game features 16 missions allowing you to play through the story mode, as well as a skirmish mode in which you can play a side story or save your progress with a "sandbox mode" function where you can use a scenario to set up a match with another user. Each player can have up to twelve units (six for each player), and each unit has many stats including attack, defence, and other tactical categories that are used to win the battle. Furthermore, each "what if" scenario includes a time limit so that there is an optimum way to play through each mission. As the game progresses the balance between the two sides shifts with the Reaked Empire having greater numbers of units (hence the name of the game "Haegemonia") and the Iron Republic using heavily-armored troops to both attack and defend. As a result the winning side isn't always necessarily the one with the most troops or units. Overall, a fun game with an interesting concept. The interface is rather easy to use and the game play is quite well done. The tutorial is quite intense with quite a bit of information given to the player. The Iron Republic and Reaked Empire were the most enjoyable side to play, as they are the only units with options to choose from. I enjoyed playing through the story mode and skirmish as well as the sandbox mode. If you are a fan of RTS games, I recommend that you give this a try. 90% GameSpot Command & Conquer: Red Alert is the classic turn-based Command & Conquer that for C&C Fans its worth the money.88% A.A. Games (Triple-A Game Reviews) Command & Conquer: Red Alert is one of the most playable, well designed Command & Conquer, and has the most difficult gameplay in it. It really shows how good the developers are with making certain decisions that don't necessarily have to be made that way, but because it worked, it made the gameplay that much more enjoyable.

! A few months ago, on August 24th, 2002, BBS Radio released the Dungeons 3 Soundtrack in mp3 format (replacing the previous 128 kbit WAV disks) for free distribution. For those people who don't know what BBS Radio is: when you are surfing the WWW via a modem, you can download lots of original-quality mp3s onto your PC for later listening of at your leisure. I do it myself on a regular basis, as does many thousands of other people. Now, with these disks in hand, here are some words from the Mage. The temporary link (click) will automatically play the disks for anyone who wants to listen, Please copy and paste this into a html window and send it to yourself, or any other person who wants to listen, and then add to your list of BBSs which will automatically play the disk for you. "Space Mayhem" is an addicting little arcade shooter with awesome graphics and a huge multiplayer community! - Space Mayhem is a good looking arcade game in a retro style. You are on a journey to fight against space pirates and explore space to find epic powerups and hidden secrets! This game will bring back memories of the classic arcade games that you played when you were younger. - There are powerups to collect, enemies to blow up, and ships to fly! - There are many type of ships which you can unlock by collecting coins. Each ship has its own leaderboards. - Full motion video. - Cinematic experience. - Player can design their own ships and add skins to it. - 3D graphics on Steam! - Supports original soundtrack and many modern songs. - Various difficulty modes and settings. - Also, enjoy the many different campaign modes. - Free to play. - Compatible with different platforms. - Enjoy playing with or against your friends. - Find your friends on Steam. - Socialise on your favourite social media. - Support the game development of Space Mayhem! Will we see more games like this in the future? Space Mayhem is the sequel to my first game "Space Crusade". Space Crusade was made to be the casual, family oriented game that I wanted to make when I first started making games. It was a huge success and sold over 10,000 copies. It raised around \$150,000 through the Kickstarter campaign. However, Space Crusade was not focused enough to keep up with the evolution of the game market. Space Mayhem is a direct sequel, but significantly more polished than Space Crusade. The game is also on mobile platforms for both iOS and Android devices, as well as Windows. Space Crusade was only available for Windows. I plan on making more games, but will not limit myself to a specific genre. I am open to anything! "Space Mayhem" is the best arcade game I ever played. It features many additional game modes and is still very well balanced. Keep a good highscore! The best part of this game is that it keeps track of your top score on the global Steam leaderboards. It's a really neat feature. The graphics are great, too. This game is now on PC, Mac and mobile devices and has even been ported to VR! Very fun shooter! You might get addicted to it. Very fun, nice graphics. The game
