Introducing Photoshop Before you even think about your camera and start downloading photos, you need to know about the program that will help you edit your photo for the best image — okay, that probably goes without saying. Photoshop can be intimidating. So, in this section, I help you navigate through its many options and workflows, to make sure you have the best photos from your camera. A little history Photoshop first came to the world as a program that retouched portraits. It was a breakthrough for those who wanted to enhance and change the looks of portraits. In 1993, the company shipped the first versions of Photoshop. The program gained popularity with its features and usability. Before that, photographers used other programs, including Adobe's own PhotoShop Paintshop and Photoshop. Filters are the original power tools The original versions of Photoshop were perfect for raster image manipulation. You'd think the program would only deal with raster images, but it also supports vector image formats such as Adobe Illustrator or Adobe InDesign. In the olden days, layers were a rarity. You had to draw each thing on a layer, and then you'd just trace that layer's raster image (refer to Chapter 7 for the gory details on layers) on the other images. The new layers After the early years of Photoshop, it seemed like layers were missing for a while. Then, in the early 2000s, Adobe added those layers to Photoshop, which made raster image manipulation easier and more powerful. Admittedly, the program still feels more complicated than, say, Apple's iPhoto — probably due to its features and complexities. In 2013, the company released Photoshop Elements, which is a program for raster image editing without the tools or complexity that come with Photoshop. The program is a stripped-down version of Photoshop for people who want to edit photos without Photoshop's more advanced features, or for people who can't afford Photoshop. You can find out more about Photoshop Elements at `www.adobe.com`. Photoshop's user interface The user interface of Photoshop is what makes it easier to use the program. It has a workspace with your images open and working in your photo library. You

Q: Kubernetes how to get the cluster ip address of all nodes When using kubectl cluster-info I get only one ipaddress kubectl cluster-info gives only one ipaddress Why? How can I get all ip address of my kubernetes nodes? I also want to get the loadbalancer ip address for each node. A: Your best bet to get the load balancer ip address is using a kubeadm pod, which is not something I'd recommend as you're kind of defeating the point of having a managed Kubernetes cluster. You can list all the kubernetes nodes with the following command: kubectl get nodes You can also get any particular node's IP address with: kubectl get pods --selector=your-labels-here -o=template --template='{{.spec.nodeName}}' Cadmium concentration in vegetables, foodstuffs and drinking water. Cadmium concentration in various groups of foodstuffs, vegetables and drinking water samples were determined using atomic absorption spectrometry. The cadmium content of the samples was in the range of 14.1-1522 micrograms/kg. Cadmium was found in various types of food and vegetables. The concentration of cadmium in vegetables of the rural areas was considerably higher than that of the urban areas. On the other hand, the concentration in the water samples was highest in the coastal area. The concentration in food has increased with an increase in the concentration in vegetables, but not in drinking water, when comparing the concentrations in 1984 and 1989. The cadmium concentration in vegetables in 1984 in the coastal areas was much higher than that in other areas, but the cadmium concentration in 1989 was found to be higher in the urban areas than in the rural areas. As the concentrations in the food in 1989 were similar to those in 1984, the increase in the level of cadmium concentration in food in 1989 can be explained by the general increase of cadmium concentration in the environment, and not by any particular increase in the amount of cadmium intake.Q: Firebase Database Security Rules, CAS and Application Configuration I was trying to make a real-time-clothing store, and I have encountered a problem with Firebase Database Security Rules that I can't
