An absolute must-buy for people into the ARPG genre, the game is an absolute must-buy for people into the ARPG genre. It's a wonderful blend of stylish combat and the beauty of a world that's as deep and as breathtaking as its story. If you are looking for a deep and challenging game that's as beautiful as it is mysterious, it's a good choice. But it's far more than that! Having played many an ARPG, it's rare to find one so thoroughly welcoming as this one. It features a gameplay style unique to it, and there's an astonishing amount of depth to its plot. The story is one that really grips the player, and it's a good choice for anyone into fantasy adventure. If you like playing ARPGs, you should definitely pick this one up. It's a good choice for anyone who's searching for a compelling and atmospheric ARPG. You know that feeling when you play a video game and you want to play that game over and over and over again? That's how Tarnished has me feeling. The same way I felt about Fallout 3 and Skyrim, I feel about this game. It's the type of game that, no matter how much time passes, I want to keep coming back for more. However, like I do with all of these games, I can't stress enough the importance of getting an Xbox 360 version. The game is truly amazing on the Xbox 360. Like I said earlier, this is not a game that I would recommend to anyone who likes the ARPG genre. Like the Tales series, it has a story-driven element that is, quite frankly, an acquired taste. But the gameplay might be what makes Tarnished such a nice game. Have you ever read or watched a really good story like a novel or film where you have such a strong emotional attachment to the characters and the story? Well, one of the biggest pleasures in life is getting to see people like that on the big screen or to read it in a book. That's what Tarnished feels like. It feels like a game for me. The story is simple. It's the story of a young man who wants to become the greatest of the Elden Lords. To do this, he first must overcome his taint, bff6bb2d33

More Information about URT from when KoeiTomyUW Playstation.Blog - Aug 26, 2006

From PlayStation.Blog Our thinking for URT is to make a role-playing game that is unexpected and amazing from beginning to end. This game features fluid and three dimensional art work that blends beautifully with the story line. The ultimate goal of developing a role-playing game is to create a strong bond between the player and the game, transcending the gameplay and freeing the player to act in any way he desires. In order to create this kind of bond, the storytelling must be grand and unfold at a fast pace, yet compelling. The Elder Scrolls made a similar statement with their fantasy RPG, Morrowind.

We want to create aRPG that will be loved from beginning to end with a fluid presentation. For example, we want to allow the player to change clothes during the game and can move smoothly from the action of sword fighting in combat, to an investigation-based stat-sorting game. We want to create an experience where the character is 100% your own, not a generic box. For example, the character will look completely different depending on which outfits he wears and how he places his armor.

We also want to give the player unlimited freedom. No two players playing the same game will have the same character. We want to support this unlimited freedom at all times through the game and allow the player to make any decision he desires in the game world. We want to think about what is important to the player and give the player control over these important things. Items that were not actionable will be made so that the player can make use of them.
