Sap2000 component 4.2 legal crack 7083. more docs.The present invention relates to an information processing apparatus and an

information processing method, and more specifically to an information processing apparatus and an information processing method for receiving a voice or a like voice from a user, analyzing the voice, and extracting information from the voice. As a technique for extracting information from the voice received from a user, there is known, e.g., a technique disclosed by Japanese Patent Publication No. 4-10686 or Japanese Patent Laid-Open No. 6-86711. The disclosed technique is for extracting a voice that a user talks with another user by analyzing the voice and, hence, there is a need for a certain level of familiarity or skill to users to accomplish the extraction of the voice that the user is talking with another user
