It is the mother of all ramdisks and you. Show HN: How to speed up your boot
time in Chrome - jrepinc ===== jrepinc Hi all, I spent my entire summer

working on boot speed and I made a chrome extension to speed up your Chrome: it will remove all the blocking ads, scripts and other things from your page, and only show the content when it is fully loaded. I would like to ask for any feedback or comments on it :) The influence of carbohydrate-based matrix on the mechanical properties of nanocrystalline apatite implanted in avian osteogenic cells. To stabilize apatitic calcium phosphate biomaterials, several polysaccharides, e.g. chitosan and hyaluronic acid (HA), were used to form the calcium phosphate/polysaccharide composite. Nanocrystalline calcium phosphate and HA powders were prepared via a facile water-assisted ultrasonic spray-drying technique. Based on scanning electron microscopy (SEM) and Fourier transform infrared (FTIR) analysis, the as-synthesized bioactive composite was found to have a good interfacial adhesion. The addition of HA to the calcium phosphate cement significantly improved the Ca/P molar ratio and the bioactivity of the material. The ability of bone marrow cells (BMC) of the chickens to attach on the new scaffolds was evaluated using scanning electron microscopy (SEM) and confirmed by fluorescent staining. The results showed that cells could attach on the surface of the scaffolds. Proliferation and differentiation of cells were identified by the Alizarin Red staining. However, the cells viability on the experimental scaffolds was significantly higher than that on the control one. Furthermore, the mechanical properties of calcium phosphate composite were evaluated and compared to control. The ultimate compressive strength of calcium phosphate composite was found to be significantly higher than that of control. The Arizona Cardinals remain at the top of the list in the National Football League in terms of percentage of players on the active roster who are former first round draft picks. From the Cardinals' 2013 rookie draft class, a list of all-rookie picks has been compiled in the chart below. It's worth noting that this chart is based on those players who are currently on the roster and still have a year of team control left
