Starpoint Gemini is a turn-based tactical starship simulator focusing on the control and strengths of individual ships and captains rather than unit damage and combat strengths. The ship classes are divided into cruiser-sized vessels with heavy-combat capabilities, medium-sized battlecruisers with light-combat abilities, and small fighter craft that can only be used in conjunction with the larger vessels. The game features a variety of sci-fi settings and events. The players take a direct role in their small ships rather than hundreds of millions of tons of steel. The variety of ship controls will require the player to make tactical decisions that are based on the in-game ship's capabilities. Points in the ship's skill tree are gained and spent as player skill decides. The game presents a multitude of scenarios in different settings. Players can choose from different story lines and equipment, all carefully handcrafted for each scenario. The game features a slew of Random Events and Modules that are triggered during the game. The mode of play can quickly turn from a straightforward exploration mode into a tense combats mode. In multiplayer mode, ships are grouped into fleets consisting of a captain and a small number of auxiliary vessels. Combat mode is based on a resource management system where ships have to be kept free for use in other parts of the game. The combined effects of science, weapon power and crew are taken into account when forming a fleet. There are different scenarios like direct conflicts in space where a ship is locked on an enemy and must attempt to close with the enemy ship to cause damage using its weapons. If the ship gets too close, a significant portion of the ship's crew is lost and the ship is destroyed. Battles are won when the enemy ship is destroyed or the player's ship has caused enough damage to the enemy ship. The player can send fighters in to bring down enemy fighters before engaging on an enemy dreadnought, special attacks. Interactions with other ships is limited to command and communication channels. The players have to make decisions in order to keep up the ship's combat ability. However, experienced captains can also use trickery and several available system skills to get an edge on their enemy. Main Features: The controls, in Starpoint Gemini, have been designed in order to give you control over your own ship. The large ship systems are, for the most part, similar to the ones used in games like FTL: Faster than Light and Europa Universalis IV. The small ship systems, however, are unique to Starpoint Gemini and unlike the combat

Insomniac has proven to be a most capable studio with their previous game titles. These titles include Marvel's Spider-Man, Sunset Overdrive and now Insomniac's new sleeper horror title, Insomniac's new game Insomniac is set to be unleashed on the world in less than two months. The game is going to be released worldwide on the PS4 & Xbox One systems and is set to be a classic of the genre. But with success comes change and Insomniac have openly admitted that the new game will be completely different from anything the studio has previously done. The truth is Insomniac have always made games that are nothing like any of their previous titles and this time is no different. Insomniac CEO and creator of the FNAF series, Mark O'Hara says that this new project has been two years in the making, "This game was conceived by us and nobody else. It's the most radically different game we've ever done." So how has Insomniac gone from developing their first well-known game franchise to something that is going to be unlike anything that the studio have ever done before. Mark O'Hara continues by stating that the main idea of this game came from him after he worked on the previous game which was a "twenty million dollar project" and soon realised that "What the hell am I going to do now?." I guess that's the birth of Insomniac's new game Insomniac's new game is going to be an indie horror game with a unique style of gameplay. You see, the creators at Insomniac have always been coming up with unique ideas which is evident from their previous titles that they have produced. FNAF games are known for their crazy "scare-a-thon" gameplay where players are terrified by the strangers that appear at night. From FNAF 2 onwards, every FNAF game has explored new options in which players are made to feel uncomfortable in their own home. Sunset Overdrive's world is obsessed with futuristic everyday objects, things that go wrong quickly and causes mayhem. In this new upcoming game, Insomniac is set to do the unthinkable, they are now going to tell their players what to do. Yes, the story is set to tell players what they can and cannot do in the game. Mark O'Hara explains: "Most horror games are ways to make

(Illustrated Edition) For many travelling families, it's a tempting holiday break destination, a place where they can recharge their batteries, relax and have a bit of a break from the routines of daily life. Even for London family, when it comes time to choose what to pack for the trip, in the minds of many it's a list of essentials: max three bags, no spare minute - sounds about right? But that old chestnut of a 'one day in London' experience can be an incredibly rich and rewarding one - if you're willing to pare back the stuff to bare essentials and just revel in the experience. Even if you never travel again after your trip to London (I hope you don't), let's see what this city can teach you... One Day in London London's accessible from the moment you arrive at your hotel. Know where you're staying before you even land. With London Heathrow airport within easy reach on the M4, there are over 200 hotels just a few minutes away. Head straight to the nearest tube station (Map of 22 bus routes with tube, rail and main car parks here). If you're further afield from the airport, the Underground and overground is generally your best bet for travel and to get to the city centre, it's a must, whatever way you arrive. The Tube Runs all day every day, 6am to 11pm, with the Central Line, Circle Line and Northern Line running every few minutes, even on Sundays. Knowledgeable Tube travellers tell us the best time to be in London to avoid crowds is 10-11am on the first Sunday of the month, when the busiest stations with no trains leave and a general exodus goes on. There are a few key stations to remember at the beginning: Kings Cross St Pancras for getting to London Bridge and South Bank and may offer a good view of London; Euston is for getting to the West End and Ealing Broadway for Stratford

High Street. With so many places to explore, it's easy for any traveller to get off track. Don't let it happen at your hotel. With websites like hotelreservation.com providing the hotel booking process within several clicks, it's easy to book a hotel right where you want to be, for a price you can afford. Ridesharing - note this is not Uber but the equivalent: a driver-for-hire with
