I have only made real cutsÂ .Q: Creating and trying to use a software named "CodeWallet" for Windows My thoughts: I want to create a software for Windows which can change the DNS providers in the Windows registries and to be able to view and edit the DNS values in the registry. For this I'm planning to use the software named "CodeWallet". I've already downloaded the package provided for Windows here and I successfully got it installed on my Windows 10. Now for the problem: When I run the "Write to registry" option in CodeWallet, I receive the following error: I suppose that this means that I should close the program? A: Yes, you have to close the program. It
