The present invention relates to an ink jet recording apparatus and an ink jet recording method. More particularly, the present invention relates to an ink jet recording apparatus and an ink jet recording method for recording image information on an image recording medium. In recent years, ink jet recording apparatus have become increasingly popular as information output means capable of outputting good-quality color images at low running cost. In the ink jet recording apparatus, as disclosed in Japanese Patent Application Laid-Open Nos. 55-6561 and 61-136361, the ink jet recording apparatus is provided with a recording head on which the respective nozzles each for ejecting ink drops of a predetermined size in the direction perpendicular to the sheet surface of the recording medium have been arrayed in a line at equal pitches and the recording head ejects ink drops of the predetermined size from the respective nozzles while moving in the direction perpendicular to the sheet surface of the recording medium in accordance with image information to form a dot on the sheet surface. Generally, a plurality of recording heads each for ejecting ink drops of the predetermined size from different nozzles are used to effect color recording by superimposing ink drops of different colors for each pixel on the sheet surface. In the apparatus of the conventional type, the recording heads are moved and stopped each time the respective colors are recorded. However, for example, for the ink jet recording apparatus of the type that the recording head performs a sweep movement in a certain direction and ejects ink drops from the nozzles as the recording head is moved, if the sweep movement is continued while the recording heads are moving, the ink drops ejected by the respective nozz

What's new in White Day - Christmas Costume - Ji-Min Yoo:

In my regular column here at Massively OP, I try to get my perspective on what's going on in the MMORPG and multiplayer game landscapes to work for me and my current play habits. In that vein, I presented a bold plan to add a point of view to my regular column, trying to represent what I thought MOBAs (Multiplayer Online Battle Arena) could be when they cracked the code and freed themselves from the obligation of trying to strive for realism. Yesterday, I went a step further than what I'd set out to do, by setting my column to run in tandem with our own news on the Wikipedia. The inception of that approach was that I wanted to get a chance to catch up on all of the things that I had missed during the month or so when I wasn't planning to do this. What I now have is a more persistent platform to do this on, as well as some added freedom to try to get into the news without having to squeeze it into the column, but I've started as usual in the direction of trying to use my own experience, so that's the cliché of the week. Don't ask me to turn that around: I already have. The stories I managed to write over the course of January all seemed to be going in the same direction, so I finally decided that I didn't want to start off with the usual "Whyyy was Ultima all of a sudden?" and start with the break from the February articles. Instead, I decided to write about some topics I've been thinking about for some time now. First up: I've been trying to think about what I want to do to bring a little extra dimension of variety to my "one game a week." I've spent a lot of time in old school MOBAs, games where the "aim" to succeed as much as possible isn't the right focus, and attempting to describe why I like those gives me a one word answer. They're soloable, but have a strong sense of cooperation, with a few crucial exceptions. I keep thinking about that one game and how much it reminds me of Lemmings (a great inspiration for all sorts of games, despite the main "hit and run" approach of the mechanics), where the goal is to get your group of ninjas deep
