As you can see, they are either ready, or still in progress (so I guess we'll see what they come up with in the near future) Some more notes: As you can see, the VTT and Lua files have direct download links. If you have issues, please let us know. They are also giving information about some of the mod features on their Website. That's pretty much it. Enjoy! Thank you to those who helped! ^_^ #=====

Q: How do i get text from an arbitrary html node into an email body using python I would like to get text from arbitrary html node into an email body (in a python script). If possible, it would be best if the method had returned a safe string. Is it possible? I need to be able to use this method from an email body, if it is no-one at my company would like to keep using it.

A: You can use BeautifulSoup for this, specifically for finding and getting the text out of a Node. I'm not 100% sure about the safety of the text retrieved (though it should be given what it is doing), but it's definitely a reliable and smart choice.

The Odin Sphere Ace is an old game crack, which wasn't updated to be compatible with newer OS versions, because of the very low demand and high demand for the old version. After a thousand of downloads and being one of the most downloaded games on Steam, I decided to fix it and add more compatibility features. But keep in mind, I don't want anyone to download this crack and then claim that it is something new.

All credit goes to who updated his crack and created this pack.
