If you are a Car Racing Fan and like the famous Gran Turismo Game you will definitely love this game. Collect medals on different activities to unlock a great number of new cars, accessories and a new plot with new vehicles to drive! The StoryLine of the game in a nutshell: You are a young driver who has become a racing legend by winning championships. Your older rival was so jealous that you won the races that he kidnapped your daughter and forces you to sign a contract with him. Now you will have to fight and drive for revenge! First of all, the game is played with a VR set. So you need to use a Gear VR or an Oculus Rift. You can also play it with a 360 gaming monitor but it may not work, I don't know. But you will have to tell us to fix a bug in the code.To understand the controls, you can use a mouse to control your car. But you have a pistol grip to turn in a car drive. Zoom and tilt the gear to walk in the environment, and press the track buttons to drive. If you press the accelerator at the same time as a track button you will start to accelerate. You have 1 meter to contact a block, and you need to push it to cross the block. Some blocks have a red/blue color, and some blocks are broken. If you brake, you will crash, and crash on the wall! If you crash and flip upside down, you will begin to fly out of your car and then you will crash again. If you crash and you have no life you will have to start from the beginning to drive again! You will receive a certain number of points for winning races, and you need to collect more points to finish the game. You will have the chance to create new tracks using block or a hammer.
