Description For more information about HERO visit: electrophysiological measures of sound- and music-induced distortion in normal-hearing adults. The purpose of this study was to assess the distortion of music and speech in normal-hearing adults, as reflected in speech-evoked, middle-latency auditory-evoked responses (wave V and N1). Thirty adults with normal hearing were included in the study. Each participant was exposed to three pieces of music or speech in random order to form a sound- or music-induced distortion experiment. Audiograms were obtained from the participants to ensure that they were normal-hearing adults and that the hearing levels were sufficient for the exposure conditions. Digital waveform wave V and N1 amplitudes were measured for the first 250ms after the onset of sound (at 0-100ms, 100-200ms) or music (at 0-100ms, 100-250ms) and the first 250ms after the offset of sound or music (at 0-50ms, 50-100ms). The results show that wave V amplitudes in response to musical sound stimuli are smaller than those of speech stimuli. Both wave V and N1 amplitudes are smaller in response to music than speech. There was little change in wave V or N1 amplitudes after music or speech exposure. The results support the fact that music and speech engage different brainstem regions. to begin to clean up his reputation and resume his career. To this day, Hollywood tabloids have never done any more about the Petite Liesthan they did about those bogus rumors that Brooke Hogan was Demi Moore's stepdaughter. And unlike the Hennenbaum lies, Brooke and Eddie's small lies at the time were about something tiny and inconsequential to their souls. Not only that, but in addition to being lied to, the two of them were having an affair, which ended when Eddie was so smitten with Brooke that he pursued her like a lovesick, sappy nineteen-year-old. All this is to say that, at least on his good days, Eddie Hennesen Jr. is nothing more than a coward. As for the rest of them, we should expect that they will continue to walk the tightrope of being the public personas of their true selves while faking it until they almost make it, just like they did at the Republican National Convention back
