This effect can be removed with the 'antique' effect in the menu. If you are not pleased with it you can also remove it by your own, but remember to put the 'antique' effect then. Seizure activity was the only obvious clinical disturbance in these patients. Somatosensory evoked potential recordings were performed over the first recording session (17-21 days after admission). Findings in patients were compared to evoked responses obtained during continuous slow-wave sleep in two subjects without delirium. ## **What's new:**

**Only in CR this week - Purple Loox Review When Microsoft launched Games For Windows LIVE on Tuesday 31st May it immediately raised a few eyebrows. It wasn't only because of its middle-of-nowhere release date or the fact that it's a service. No, the thing that drew the ire of gamers everywhere is that it's a GFWL integration thing. Microsoft is the Queen of Integration - surely they would be making their own stuff, not allowing third-party publishers to integrate their own titles into Live? As a result of this launch, 'color matching' and FIFA 12 seemed to be the main feature for this new service. So if you didn't already know that Steve Healey is one of the brains behind FIFA 12 and used to make a living making the Legends feature in the EA Sports games, it's no surprise that his service is called Color Matching. Basically you log into your Live account, download the client onto your Xbox 360 (it's available for the free trial version), sign into a region that Live is active in with your Microsoft account and you can start shooting games around town. To put it plainly - this is not GFWL. Just an Xbox LIVE region created by your Microsoft account. Steve Healey must be learning a LOT from Mark Turmell. So what about the FIFA 12 title - is it a big step forward from the past FIFA titles? Only if you've played FIFA 11. Or FIFA 08. Let's dig into the archives and witness the legendary Steve Healey - Ready For Action. Always a real tough task to do - score a goal. Not so on this Xbox LIVE! You can see what I mean about the level of detail on the campaign story. I've played enough FOOTBALL games now to have probably written three novels between 1998 and 2004. I should be able to pick out Dave Seaman as a prime example of good play, but it's almost impossible. This detail makes me wonder if it's even FIFA that's such a throwback to the bad old days,**

or if it's always been like this. No wonder FIFA 08 wasn't any great shakes. Meanwhile EA help themselves to the Modern Era by way of unrealistic FCS tactics, so the whole thing ends up looking like I'm playing CPO / GK kicking the ball around
