History of AutoCAD If you're like me, you're probably eager to know more about the history of the very popular AutoCAD software. Thoughts on Survivor: Heroes vs Healers vs Hustlers: Lost – Episode 17 The Heroes vs. Healers vs. Hustlers tribe merged into one tribe this week. Before the merge, I thought that was a stupid move because it leaves people in the game for a long time with few people having a chance of making the merge at the merge tribal. It really wasn't until they merged that I started seeing the big picture. I'm not sure how that happened. Once the merge happened and the dust settled, I realized that merging the tribes was the best move they could have made. It essentially gave each person a "mini-season" to further their cause. The longer each person is in the game, the more chance they have of winning the \$1 million. Not to mention, being in the same tribe with the 5 vets who you are up against just may be the biggest disadvantage in this game. I'm very excited to see how things play out for these 6 players. They've been put into some strange situations in challenges, but I do believe they are all going to be fine. They are definitely the most loyal to each other. Everyone has a bit of a dark side that could come out at any time. With that being said, I don't see anyone losing the game. Here are the thoughts I have from this episode: Jurantia – I think what makes him stand out from the rest of the tribe is that he doesn't stick to what they call the majority vote. Every now and then he'll follow his own path and it might work, but most of the time it doesn't
