The Puck Daddy Power Rankings A few weeks ago, the lads spent some time in the Puck Daddy HQ just to have some fun. They poked about. Huddled. Spilled milk on the floor. Started a forest fire. Seriously. Anyway, all of the hockey-watching boys have some time off, so we decided to do the same. Go some place new. We chose to go to Key West, Florida. We had an amazing time. You can read about all the antics we had over at the LNHFforums.com. Obviously, when you guys get to give your comments, that will be the place to go. Leave your comments below about the Puck Daddy Power Rankings. Parent-infant interaction of preterm newborns. It is essential to know how to interact with preterm newborns to promote their growth and development while limiting the risks to the infant. Mothers play a fundamental role as caregivers and should be provided information on how to interact with the preterm infant. This information should be provided as a structured program designed to promote health and growth, nutrition, and development. Preterm infant's parents should be given the option to return to the hospital for continued monitoring and support. package com.mashibing.proxy; import com.mashibing.dp.proxy.Capture; import com.mashibing.dp.proxy.HTTPProxy; import com.mashibing.dp.proxy.Proxy; import org.junit.Test; import org.junit.runner.RunWith; import org.springframework.beans.factory.annotation.Autowired; import org.springframework.boot.test.context.SpringBootTest; import org.springframework.test.context.junit4.SpringRunner; import static org.hamcrest.CoreMatchers.is; import static org.junit.Assert.assertThat; @RunWith(SpringRunner.class) @SpringBootTest(classes = CompositeServiceApplication.class) public class CompositeServiceApplicationTests { @Autowired private Proxy proxy; @Test public void test() { System.out.println(proxy.getHTTP()); System.out.println(proxy.getFTP()); System.out.println(proxy.getSm
