20.2.5 SE: jmd5.comProbiotics in the management of functional gastrointestinal disorders: a systematic review. Functional gastrointestinal disorders (FGIDs) are common in clinical practice, but the role of probiotics in their management is controversial. We performed a systematic review to determine the effects of probiotics on FGID in patients with functional dyspepsia, irritable bowel syndrome and functional constipation. The following databases were searched: MEDLINE, EMBASE, The Cochrane Library, Web of Science, Cambridge Science Abstracts and Scientific Information Online. Double extraction of data was performed, and pooled odds ratios (ORs) were calculated by using a fixed-effects model for dichotomous data, or by using a random-effects model for continuous data. Sixteen studies (7 randomized controlled trials, 5 case control studies and 4 cohort studies) met the inclusion criteria. We did not find any beneficial effect of probiotics on dyspeptic symptoms. Probiotics may have a positive role in the management of FGID in patients with irritable bowel syndrome and functional constipation, but there is a lack of data on this issue. Further studies are needed to clarify the effects of probiotics on chronic functional gastrointestinal disorders.[Sialography using 99mTc-HSA for salivary gland diseases]. The tissue distribution of the radiolabeled human serum albumin (HSA) was studied for its possible use in sialography in conjunction with a gamma camera. Subcutaneous injection of 99mTc-HSA was performed in 5 subjects. Tissue specimens taken from skin, salivary glands, lung, thyroid, liver, kidney, heart and spleen were examined for radioactivity after 1, 2, 4, 6 and 8 hours. The results demonstrated that 99mTc-HSA predominantly bound to sialic acid-rich tissues, especially in the salivary glands, which is similar to the distribution of 99mTc-radiolabeled human serum albumin (RISA). This method is suitable for visualizing sialic acid-rich lesions in the salivary glands using a gamma camera.A world where people are judged on the strength of their convictions rather than the color of their skin. A world where everyone is equal, and not just some. A world where all people are treated with respect

he was in private life a man of fine parts and of the esteem of those who knew him. The company would probably be at peace with the fact that his murderer was also in private life a most scrupulous murderer. The life of Simon Fraser, general surgeon and diarist, captain and admiral.
