Amazon In order to facilitate the needs of people who are allured by the beauty of.Q: How to get the time from the feature class using ArcGIS field calculator? I have date field in a feature class and I would like to extract the time from it. I would like to do something like:

TO\_DATE(@shape.DateField,"dd/mm/yyyy
HH:MM:SS") However, this is not working. So my
question is, how to get the time from the
feature class? A: Create a expression field that
uses the expression parser to calculate a new
field that combines the date and time field into
a single field:

(to\_date("\$Shape.DateField","dd/mm/yyyy") +
to\_time("\$Shape.DateField","HH:MM:SS")) / 100
The only remaining operation is to format the
new field to "dd/mm/yyyy HH:MM:SS". To do
 this, change the default format in the
Properties/General of the expression field to

"dd/mm/yyyy HH:MM:SS". This is described in the Calculate Field on the Fields tab on the Expression editor help documentation page. Helping people debug software when they're the only ones who can help you - kakinho
