York: Farrar, Straus and Giroux, 1966). County Clerk to Open Commissions to Meet County Public Records Law Deadline The civil service commission for Davidson County will hold its first open meeting July 31, to comply with a new public records law. County Clerk Kim Davis announced this week that the meeting will take place at 10 a.m. in the public hearing room of the Robertson Government Center Building, 600 Hampton Road, Lexington, at the corner of Lee Highway and Hampton Road. The hearing is open to the public, and the meeting will be in compliance with the Public Records Law of 2005.

This will be the first meeting since the law's effective date last week. Davis said the board of commissioners will approve a tentative staff recommendation of a new budget that will be submitted for approval to the Davidson County Board of Education this month. "The first thing they will do is develop a tentative budget for the upcoming year," Davis said. "They will approve that and it will be submitted to the Board of Education for their review

To evaluate the pattern of cardiac involvement in children with atopic dermatitis (AD). A prospective study of 70 children with AD and 50 controls matched for sex, age and ethnicity was performed.

Echocardiographic measurements were obtained in both groups and the relationship between echocardiographic parameters and eczema severity was analyzed. Sixty-eight of the patients completed the study protocol. The mean age of the patients and controls was 8.9 ± 3.1 years and 8.9 ± 2.9 years, respectively ($p = 0.85$). AD patients had greater left atrial and left ventricular diameters and a greater left ventricular mass than controls. However, the mean values of these parameters did not differ significantly according to the eczema severity.

None of the patients had ventricular hypertrophy. Children with AD had echocardiographic abnormalities in the form of left atrial and left ventricular enlargement and a greater left ventricular mass. Left ventricular hypertrophy was not found.Cloning and expression of a melibiose permease from *Bacillus subtilis* in *Escherichia coli*. Melibiose permeases from various sources have been

isolated by affinity chromatography on maltopentaose-Sepharose 4B. The cloned melibiose permease from *Bacillus subtilis* 168 on the other hand was isolated by immunoaffinity chromatography. Highly purified recombinant melibiose permease from *B. subtilis*, MelB, is characterized. MelB has an affinity for melibiose of 16.7 μM , a K_m of 0.2 mM and a V_{max} of 1500 nm
