I have an array of strings: @('C:\LongPath\File.txt', 'D:\LongPath\Long2\File.txt') How do I remove the C:\LongPath\... and D:\LongPath\... text from the string array? I used the answer by @John in this thread. It works great in this scenario: $files = @('C:\LongPath\File.txt', 'D:\LongPath\Long2\File.txt') $files -Replace "D:\LongPath","'' But it doesn't work in this scenario: $files = @('C:\LongPath\File.txt', 'D:\LongPath\Long2\File.txt') $files -Replace "C:\LongPath","'' I believe because Replace uses $Matches.Index as the index into the original array $files. I am trying to use the answer with this syntax: $files -Replace "C:\LongPath","'' Any idea what I need to do? Thanks A: Try using -replace with a regular expression in the search string. This will cause -replace to iterate over the array instead of treating the array as a single string (the search string). $files = @('C:\LongPath\File.txt', 'D:\LongPath\Long2\File.txt') $files -Replace ("C:\LongPath", '') Nepcon is a monthly conference for senior active drug research and
