True blood Season 1,2,3,4,5,6,7,8,9,10,11 Download (RARÂ .Q: Oracle temp table type Which temp table type is used by Oracle when writing the data? Is it temporary table or some other temporary object? A: The type of a temp table is temporary, i.e. it is an anonymous table as defined in the documentation for CREATE TEMPORARY TABLE. You can view the definition of a temporary table in the SQL Reference in Oracle (with link to the relevant section). If you want to know exactly where the data for a temp table is stored, you can also use the ALL_TABLES view in the Oracle Database: SELECT owner, table_name, column_name, data_type FROM ALL_TABLES WHERE table_name = 'TEMPTABLE' For the definition of temporary tables in SQL Server see the similar question. Q: Adjusting the "Value" of a DoDragDrop object in VB.NET I'm trying to make a program, that will allow the user to drag and drop a file onto their desktop. I want it to be able to drag multiple things from their desktop into my program. I have already set up the DoDragDrop Control, dragged things onto it, and noticed the drop events happening. I used the below code to test to see if the drag actually had something in it: private Sub onDrop(ByVal sender As Object, ByVal e As System.Windows.Forms.DragEventArgs) If e.Data.GetDataPresent(My.Resources.General.RootDirectory) Then 'Here, I'm simply putting the file into the project folder. Dim str As String = e.Data.GetData(FormatName:=DataFormats.FileDrop) TextBox1.Text = str End If End Sub This does work, but now I want to change my program to include multiple files. I have seen around the web that simply using the "Files" form of the DoDragDrop function will allow you to use multiple files. However, I was unable to find any example of this, or if it even worked
