How to automatically run webpack-dev-server in C# In a C# application I'd like to automatically run webpack-dev-server after a minor change to the code. Is it possible to directly launch the webpack-dev-server with webpack-dev-server.config.js and have it automatically start (and then stop)? A: I found a solution by modifying webpack-dev-server.config.js. Change this: `var createServer = require('http').createServer(webpackDevMiddleware);` to this: `const createServer = require('http').createServer(webpackDevMiddleware); createServer(on); const on = function (req, res, next) { console.log('request for', req.path); next(); };` This will start webpack-dev-server asynchronously and print in the console a log of all requests sent to the application's API. Q: Adding dots to #selector I am trying to create a #selector with a label and a dot or tag. What I have created is the following: `#selector { -webkit-user-select: none; -moz-user-select: none; -ms-user-select: none; user-select: none; } .dot { border-radius: 50%; background-color: #ff6900; width: 12px; height: 12px; display: inline-block; line-height: 12px; text-align: center; position: absolute; } label { display: inline-block; width: 25px; font-size: 12px; line-height: 24px; text-transform: uppercase; text-align: center; 6d1f23a050`
