Enter your email to subscribe to our once-weekly newsletter:.Q: Connect to ALM (Application Lifecycle Management) Hub I am trying to connect to ALM Hub from our client so that I can retrieve project information from them. This app is not a dev app, but we need to pull this information to do basic analysis of the release process. When I connect, I get an error indicating that its an internal error, (high trust app), and that the field must be set to public. The information is that this app is internal, and I cant find anything in the documentation about using it in this fashion. I have tried to connect from a number of different machines with different accounts - using their Business Id or User Id with no luck.
