telechargerlogicielcovadis14torrent. .. 2020-06-26.Q: Retrieving session data with Rails using Flash?
I've got a form on a page that I am using Rails Flash to submit to a server side method. It looks
something like this: 'New Post' %> On the back-end, I have a new record being generated but I also
want to be able to grab the session variable value I created within the controller. In other words, I
want to be able to grab something like: [:notice, :status] [:twitter_content, :status] Within the
following function: def twitter flash[:notice] = 'form has been submitted' redirect_to @new_post_url
end And then in the view page I've searched for a solution with no luck. Is it possible to do this? A:
Just pass the flash variable to a helper that takes the params hash: def twitter flash[:notice] = 'form
has been submitted' redirect_to @new_post_url(params[:notice],params[:status]) end and in the
view This helper: def twitter_flash
