As with any asset, keep in mind that the download method and size greatly depends on the model, and there is no way to make any guarantees on the size of the assets. Furthermore, certain models might not be optimized for your art application as they have been specifically created for use on other devices. To share the scene with friends, you can use the Share via File button and choose their email address. It is best to have at least one online storage service or be connected to the internet to download, as you can choose to only download part of your scene. The Downloaded scenes are saved in the Desktop (Mac) or Downloads (Windows) folder and you can easily navigate there with the Back and Forward button at the top of the Files list. To remove a downloaded scene, simply hit the Delete button located in the upper-left corner of your DAE file. Feel free to try out this sample file using the above instructions, and if you like it, just save the scene and share it with your friends!
