after a post on the forums, the team behind f1 challenge has released a detailed release notes and a couple screenshots demonstrating the game in action. both the comments section of their forums and the most recent release notes are littered with praise for a feature that did not make it into the final game: the team is planning to release a free demo version of the game on january 10, and at that time they will implement the feature that players so wanted. looks like the challenge mode coming to trivia crack isnt the only one thats going to arrive in 2007. this was a game that could have, in the right hands, made a stronger impact in 2007. anyone who didnt play it remembers it for the challenge mode, but didnt come away from it for all the right reasons. f1 challenge in 2007 might just have a chance of being that game. the full game hasnt even been announced yet, but this is one hell of a nice puzzle game based on the f-zero style of racing. if you did at least like the challenge mode in trivia crack, f-zero challenge should have you yearning for the next racing game. check out the trailer and screenshots below: but i cannot stop calling you, my friend, because i love you. in the past six months, the android has made a great leap forward. android 3.0 is finally the fastest mobile
