# Garritan Aria Player 1.5 Crack 2021

Garritan Instant Orchestra uses a new programming method that's unique to Garritan Instruments, and I think really clever. The key is to sample everything. Most ARIA instruments are derived from the scale, chord or phrase that's active in the virtual room they're recorded in. Because we didn't sample anything else, we were left with a lot of empty spots and dead air, such as during keyboard fills, measure breaks or transition passages. To remove this dead air, we used a process called Nasal Correction, which is all about making everything that's not the active instrument, but feels right, sound more like the instrument. First we sampled from the active instrument, and compared it to the other empty spots. We figured out the most common places where the two sounds didn't sound right together, and then used it as the basis for a set of template sounds. These templates were given a compression that makes them feel like the physical instrument they're meant to emulate, but with none of the mass or sparkle. Next, we analyzed the instruments that sounded good with these templates, and sampled those parts. As the name suggests, these are the instant sounds, so they're designed to work with all of Garritan Instant Orchestra. We selected only what was needed to fill that missing spot. These were also given compression to make them feel like the physical instrument they're meant to emulate. The process of sampling goes on all the way to the very bottom of the piano. The drummer is sampled separately, then the kick drum and snare separately, then the bass guitar separately, then the hi-hat and ride separately, then the low end of the guitar separately, then the entire synth part of the piano... you get the idea. Even if you're only going for an acoustic piano, you have to take the really big steps, like going to a grand piano or a full orchestral piece. All of this is synthesized in our studios in Seattle and Prague, so the end result is truly world class, even if you only use it in your virtual studio. If we'd sampled the complete synth part of the piano, it would have been five or six GB. <http://www.premiumpure.com>
