
Diablo 2 Perfect Drop Mod Cube Recipes

i would just like to say this is by far the best mod ever made for d2. i have been playing d2 for 4 years now, i'm 18 and this mod brings back so much fun to me and my friends. i have had this mod for almost a year now and it still runs perfectly. i have had problems with the mod itself, but mainly my connection. so it can get very laggy when there are a lot of people on the servers, or when they come back from a break. i still recommend this mod to anyone who is sick of d2 trying to be more like a rts game. this mod is a masterpiece, and it's not even close to the end, i'm looking forward to seeing what the future holds for this mod. for anyone who is having problems with the mod, i would suggest to just unzip it and put the files into your mod folder. and when you have problems with lag just make sure you're not using wifi. the horadric cube is one of gaming's most intuitive items and is right up there with half-life 2's gravity gun as one of the most revolutionary video game tools ever invented. it's diablo 2's love letter to its dedicated and curious fans. that speaks volumes about the vastness of d2r's crafting system. thus it can even be daunting to try to pick the best horadric cube recipes in an ocean of them. some of them aren't really all that useful anyway. thankfully, this list has received its much-needed update and more d2r cube recipes have been added especially the ones most crucial for gameplay advantage. again, i am glad you finally updated this mod, and i can't wait to play this! i have lod 1.13d and pdm 107.2 up and running perfectly. my question is if there is an unlimited/shared stash mod that works with this combination and if there is, could someone give me very detailed installation instructions. also, for ismael, download the mod, unzip it, read the text file for the install, replace the one file in your d2 folder. make sure your install is fresh and you have been to battlenet to get the 1.13d upgrade. it upgrades automatically as soon as you log in. once you install the mod, do not go back to battlenet.
