## Kamael Download Client [BETTER]

# Download

december was a good month for me and for the game, but it was the best for the server as well. during that month, we increased our server's population by around 30%. we also started the process of revamping and rebranding the servers, not only because we wanted to clean the image, but also because we wanted to make it more appealing and visually attractive. we wanted to make it look and feel like a game like lineage 2. that wasn't possible with the current logo and the current website, so we had to change both. we also had to change our game's name because reborn was the old name of our game, which is not what we wanted anymore. we tried to make the change as smooth as possible, so we didn't completely change the name of the server from reborn to kamael. the two words were almost antonym, so we just combined them. the logo was also changed, and the website was upgraded as well. i can't remember exactly what i changed, but i know that i changed the color of the logo. i also changed the website's layout and the color. we also changed the icons that appear in the client's ui, as well as added some new icons. for example, we had to change the icon that appears in the character creation screen, so we chose an icon from another game that already existed in our game. also we

---

added a new icon for the save and load screens. to do all this we had to hire some graphic artists for the project. now the servers looks like this: \*\*i removed the old logo and the old website and put this new one in. i took a screenshot of it\*\* i hope you like it in the future we will be able to use our resources to create more items, items that will make you fall in love with the game and appreciate the work that was done in the second part of the game. even though, we are certain that if you play lineage 2, you will love every single item, every single armor, every single weapon and every single thing that was created in this game. please, enjoy it, and let us know what you think of it. we will be more than happy to hear your opinions and receive your suggestions to improve our game. you can find us on our new forum :
