Metal Gear Rising Mod

the game is set in the year 2040 and is set in the same timeline as the original metal gear and the metal gear solid series. raiden awakens in a prison cell under the s3n base in antarctica. he is rescued by his old friend and mentor, dr. naomi hunter, and the two of them escape. in the process, raiden learns that the s3n had been tracking him down since his disappearance seven years earlier. for the first time in a metal gear game, there are no bosses, just small groups of enemy soldiers that are not as heavily armed as the mgs2 cyborgs. the soldiers also use real-time regenerative health, unlike the cyborgs, who have enough hp to take multiple hits and healing items. this change was made to appease "the people who wanted to play the game with as few restrictions as possible." the game features a "safe mode" which allows the player to choose the weapons the enemies use. it also allows the player to choose the particular type of enemy he or she wants to fight. this mode is similar to the "classic" metal gear gameplay. raiden can also use the "surprise raid" tactic, where he throws smoke grenades and other explosives to create diversion to let him sneak past. kojima also said that the game will feature enhanced camera angles to capture more action and give the player the feeling of being close to the action. the game also has a system similar to metal gear solid that allows the player to quickly change the camera angle by pressing the l3 button. metal gear rising is the first metal gear game since metal gear solid 4 to not have any loading screens between areas. it also features a multiplayer mode, but it can only be played with friends online. 5ec8ef588b
