(i think it took me about 10-12 hours of searching for and downloading samples before that). this is a great piece of software. it is light and easy to use. i have used soundforge, but it just doesn't have the power that creative wave studio does. it is a bit more complex, but it also gives you more options. this has been a real time saver for me. i have used studio one, and it is also light and easy to use, but it doesn't have the power that creative wave studio does. it is a great piece of software. 5ec8ef588b
