Our new e-reader is able to give you all the information you need on a given book, all from the comfort of your couch. Here's how it works: Simply use the Amazon search feature to find your book, then select it and right-click your mouse button and select "Get Info" from the context menu. From there, you can get information on things like the authors, the size, the price, the list of more books by this author, and the list of similar books. You can even select a specific item and get additional info on it. It's that simple. For example, say I was in the market for a light novel, and I found a book titled 'Kingdom of World' by 'D'. I would simply select it from my list, and right-click the mouse button. That would bring up a context menu where I could get the following information: E-bookInfoGrabber is a small and easy to use application that will help you get information on your favorite eBooks. We Are Blue Light Therapy: Transforming Your Life Through The Healing Power Of The Sun Natural light can strengthen your immune system, boost your energy, and make you feel better. Get the same benefits in the comfort of your own home with Blue Light Therapy and the revolutionary new Gene Light V2 technology. Blue light can help you get in the right emotional state for sleep, which is essential to a healthy life. Blue light has been shown to reduce stress levels, lower blood pressure, and prevent insomnia. The ultra-bright nature of Gene Light V2 emits a safe, gentle blue light that gently regulates the levels of melatonin in your body. This regulates sleep patterns and relieves both light and dark symptoms of depression, helping you feel calmer and happier. Here are 8 reasons why you should turn the lights on more.

1. It regulates your sleep cycle. Blue light enters your eyes through the retinas and interacts with your pineal gland. The pineal gland is the "time-keeper" that regulates your sleep cycle. The pineal gland controls your cycle of wake and sleep, which affects your blood pressure, mood, and overall well-being.
2. Light boosts energy. Light regulates your energy level and affects your mood. Exposure to sunlight, particularly the wavelengths of blue light, can help you get a good night's sleep and feel more energetic.
