## Inventory Biz ERP Crack Activator Free

1. Module 2: Inventory Configuration Inventory Biz is designed to handle a large inventory database and provide you with a powerful database platform that lets you keep track of your inventory and record payments, sales or purchases for your daily activity. With a simple database form, you can quickly set up a large database, such as in-stock and out-of-stock information, costs, including materials, manpower, purchasing, all as well as units, delivery, or billing. You can also set up work orders for work orders, production lines, or stock parts, and receive customer complaints in a database format. With Inventory Biz, you can set up and maintain inventory management and stock records with a simple to use interface, quick report generation, and a data exporting function. 2. Module 3: General Functions This module provides you with various functions that support inventory management, such as general record-keeping functions and journal functions, purchase or sales functions, and record setting functions. General functions: - Record information about your purchases, sales, or transactions. - Print bills, delivery notes, or receipts. - Record inventory status information. - Record stock information for your suppliers. - Set up direct sales, if you sell directly to your customers. - Set up work orders and production lines. - Record unit consumption, such as paint, ink, or paper. - Set up a safety stock system that automatically manages your stock. - Assign a unit cost to a stock item. - Measure the inventory of an item. - Determine the average inventory turnover ratio. - Periodically issue reports based on your recorded information. 3. Module 4: Sales & Purchases Management This module allows you to control the sales and purchases you make. This module offers record-keeping functions to enable you to track your sales and purchases, as well as record invoices or bills for your sales. Sales and Purchases Functions: - Set up sales and purchases functions for each category. - Create purchase orders based on customer requests, or from existing purchase orders. - Assign purchase order numbers to each purchase order. - Record items sold and purchased by each category. - Sort items by sales or purchases. - Display the total amount of sales or purchases based on each category. - Display the total value of sales and purchases. - Assign a
