MediaArchive Crack+ Free [Mac/Win]

KeyMageddon is an application that enables you to select and copy up to 24 keystrokes and paste them into any text box or desktop window. With KeyMageddon, you can easily create macros to do almost anything you want. KeyMageddon is also a superb automation tool that can control or automate any program or browser window. Using KeyMageddon, you can automate search and copy the URL of websites on any webpage, control mouse clicks or even edit the clipboard. KeyMageddon Features: KeyMageddon has a few powerful features that allow you to perform complex tasks. Here is a list of the most important ones. 1. Create Programs KeyMageddon lets you create a macro for any text box or window that includes keystrokes to be executed with regular mouse clicks. Once a macro has been created, you can use it as frequently as you wish. 2. Create Browser Windows KeyMageddon lets you create macros that automate a search in the Internet and copy the URL of a webpage. You can also launch a specific browser window and perform any search in that browser. 3. Interact With Applications KeyMageddon lets you select, copy, edit and execute keystrokes in any program. With KeyMageddon, you can use a macro to record, edit, save and delete any file, folder or program. 4. Download Software From Internet KeyMageddon lets you copy any URL that can be downloaded from the Internet and copy the software installation script that is sent to you. In fact, it is possible to install software without installing the full version. 5. Edit Clipboard Content KeyMageddon lets you edit the clipboard contents or delete any content that was copied before you created the macro. 6. Restart Programs With KeyMageddon, you can control a program that you have launched with a macro. Once a program has been controlled, it is possible to set a new focus window, force a window to close, restart the program or resume from a suspended state. 7. Web Search KeyMageddon can search any webpage and retrieve the URL of the website. 8. Export As.scr Script KeyMageddon lets you create a new script file that has the same content as the macro you just created. It is possible to copy and paste the macro into the.scr file and execute it by double clicking the file. 9. Create New Macros KeyMageddon is a very powerful macro creation tool. Using it
