I made the iPhone case for my iPhone nanosize. I got a hold of a little lost : I liked the case that the author gave, I liked the idea of making an one for me but with a "faction", I like the challenge, so it was a pleasure to express all my skills and that is why I decided to join with myself. And I do! I teak it 3 times to make sure that I will be able to have 100% satisfaction. No problem. It was very easy for me to have everything registered in the M2 Gallery, my only little issue was that the size of my case was not the one called F' for the prototype, so I mistakenly uploaded the wrong file of size F5. Hardly enough that I could change it. It took 3 times to find it when it was already done. So I had to wait and I was notified that my case was approved and I paid my deposit, the pictures had been uploaded. No real problem. That's when I noticed that on the website, I can still see the pictures of my lost case. I did not clear them. Yet. I am still waiting for a professional to help me to do it. It's like it is not erased but you don't see the case in the gallery. So its's half displayed and the other half hidden... I had to contact my seller to know what had been done. I started to think that no one want my case, but fortunately I was wrong. However that's what really makes me frustrated. I had to be approved by the seller and my payment was really simple. But the problem still remain. As I have done on the first case, I upload it again and everything will be ok. But this one seems to have a bigger problem? And I have double uploaded it, maybe 3 times. And things still going up.
