While its tagging tools are perhaps a little too basic for an advanced user, they are by far the best feature of the program. More recently, I have been able to intelligently use the user interface to make much more efficient use of Lightroom. While the program's core functionality is still there, many of its often-used tools and features in the Preferences and user interface are now more intuitive. For example, I have found its Menu Bar is much easier to access now, since it's at the top of the window, rather than at the very bottom.

This panel gives you access to information in a photo, like geographic location and calendar time, based on where it was taken and when it was taken. You can turn this on and off in the panel's preferences, but you can't control the AI behaviour like you can in other AI-powered tools.
