Grandpa came from the same old stock as my father but he was born into a new world. That meant he had to learn a new language and a new culture. He picked up English pretty quickly and probably enjoyed the free beer. It was the accent that he struggled with for longer. I remember him saying "I'm not saying it right. I just can't say it right – I'm not from here." It's something I had to learn, too, when I moved to the UK. My first words were "Here you are," and my first job was to teach my grandfather to speak "proper." When he first arrived in England, Grandpa couldn't say anything because everything sounded a bit "weird" to him. Even his own name was difficult. Why? Because English people pronounce it in a strange way with a funny Scottish accent. He said his name was "Harry," but he heard it pronounced as "Har-_a." It's something that I forget now when I hear people say their names, but I know I have to place emphasis on the first syllable. It's not "Harry," it's "Har-a.

Together, these technologies are giving Photoshop new power." "I see what Gauthier and my account managers have been doing, and they have been trying to convince me for a long time," laughs Nick Salen.
