@fadeltron: The Most Innovative Industry on the Planet Globalfutures.ru is the website of Dmitry Bayley. Automotive. Aerospace. Manufacturing. Healthcare. From the very beginning, the most essential mission of our company was to bring a practical, simple and easy-to-use platform to bring together all those who need to find each other. Our mission is to protect the reputation of our clients and partners and also to make all sides of this exciting and challenging industry shareable and understandable. The difference is in innovation We are a global expert in the field of outsourcing and matching labor with clients around the world. We are proud to say that we have made a breakthrough in the outsourcing industry by integrating the best practices of the leading outsourcing companies and the most innovative employers from multiple industries. We work every day to provide an innovative, convenient and reliable platform for matching employers and labor to work together. Our vision is to be a leading global expert in the field of outsourcing and we believe that only through innovation can we accomplish this. The invention relates to a method for recording sound and also a recording device, in which in order to store sound signals in an audio-intermediate signal sequence which can subsequently be written onto a storage medium, firstly a reference sequence is read and stored, and from this reference sequence the sound signals contained therein are then formed. The invention further relates to a storage medium which contains sound signals in an intermediate form. Such a method and such a storage medium are used in recording devices, such as audio tape recorders, etc., in which the sound signals are recorded on a storage medium, such as a magnetic tape. The known method and the known storage medium can be used in different ways. In a first case, e.g. in a camcorder in which the sound recording takes place in real-time, or during post production, a reference sequence is read and stored, and from this reference sequence the sound signals are formed which are subsequently written onto the storage medium. In the case of a so-called on-film sound recording, which takes place within the time limit of the film projector in a movie theater, the sound signals already form the sound signals as soon as they are written onto the storage medium. If the method is used in connection with a video camera and the storage medium in the form of a magnetic tape is loaded into the video camera, the reference
